Professional Summary

Computer Science undergraduate experienced in backend and full-stack development using Java, Python, JavaScript, Node.js, SQL, and REST APIs. Strong foundation in data structures, OOP, databases, microservices, testing, Docker, CI/CD, and secure software development.

Education

Mahatma Gandhi Institute of Technology, Hyderabad	CGPA: 8.6
<i>B.Tech in Computer Science and Engineering</i>	2023 – 2027
Narayana Junior College, Telangana	98.1%
<i>Board of Intermediate Education</i>	2021 – 2023

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C++
Software Engineering: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, System Design, Problem Solving, SDLC, Debugging, Code Reviews
Backend & APIs: Node.js, Express.js, FastAPI, REST APIs, API Design, Microservices, JWT Authentication, RBAC
Databases: MySQL, PostgreSQL, MongoDB, SQL, NoSQL, Database Design, Query Optimization
DevOps & Testing: Docker, Docker Compose, Jenkins, CI/CD, Linux, Git, GitHub, Postman, Unit Testing
Practices: Agile, Scrum, Technical Documentation, Secure Coding, Performance Optimization

Projects

AI-Powered GitHub Portfolio Analyzer Apr 2026
Node.js, Express.js, MySQL, GitHub REST API
[GitHub](#) | [Live](#)

- Built a backend platform using GitHub REST APIs and MySQL to analyze developer profiles, projects, skills, and career.
- Optimized scalable REST APIs and SQL queries, reducing profile analysis time by approximately 70% and improving API responsiveness.
- Implemented structured data processing, error handling, and API rate-limit handling, improving reliability across GitHub API workflows.

Hospital Appointment Booking — Microservices Application Jan 2026
Node.js, Express.js, Docker, Jenkins, REST APIs
[GitHub](#) | [Live](#)

- Developed a microservices-based appointment booking system with 5 independent services and REST APIs, improving service modularity and maintainability.
- Engineered automated build and deployment pipelines with Jenkins CI/CD, improving deployment efficiency by approximately 60% and maintaining 100% service availability during testing.
- Containerized 5 services using Docker, streamlining repeatable deployments and reducing environment configuration.

EstateX — Premium Real Estate CRM May 2026
React.js, Node.js, Express.js, MongoDB, JWT, Docker
[GitHub](#) | [Live](#)

- Built a full-stack real estate CRM with property listings, advanced search, inquiry management, user profiles, and role-based access control.
- Developed secure JWT authentication and RESTful APIs for property, user, and inquiry management with MongoDB-backed persistence.
- Engineered a responsive React frontend with reusable components, analytics dashboards, and property browsing workflows, and containerized the application using Docker.

AI Code Reviewer — Full-Stack SaaS Platform Jan 2026
React.js, Node.js, Express.js, REST APIs, Generative AI
[GitHub](#) | [Live](#)

- Developed a full-stack SaaS platform that automated analysis of 500+ source code submissions using Generative AI, accelerating developer feedback.
- Streamlined asynchronous REST API workflows, reducing code review processing time by approximately 40% and improving application responsiveness.
- Designed reusable frontend components and modular backend services, improving maintainability through structured API design, debugging, and software development practices.

Certifications

Introduction to Modern AI Cisco Netacad Credential	Mar 2026
Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate Oracle Credential	Sep 2025
JavaScript Essentials 1 & 2 + Python Essentials Cisco Netacad Credential	May 2025

Achievements

Team Leader — HackSavvy'25 National Level Hackathon Mar 2025
• Spearheaded a 4-member team through solution architecture and sprint planning, delivering a fully functional end-to-end prototype within strict hackathon timelines.
